| Modular Production Station Handling Module | CMI-NP-1732 |

## Description

Modular Production Station Handling Module is a station with a two-axis pneumatic gripper handling workpieces between positions. It is used for teaching pick and place operations with a pneumatic handling unit.

## Technical specification

| | |
|---|---|
| Air Supply | 6 bar |
| Control Voltage | 24 V DC |

Modular Production Station Handling Module is a station with a two-axis pneumatic gripper handling workpieces between positions. It is designed for teaching pick and place operations with a pneumatic handling unit. Key highlights include linear and rotary pneumatic axes, parallel gripper and end position sensors.

**Features**

- Linear and rotary pneumatic axes
- Parallel gripper
- End position sensors
- Quick-connect tubing
- Aluminium frame

**Technical Specifications**

| | |
|---|---|
| Axes | Horizontal and vertical |
| Stroke | 100 mm and 50 mm |
| Gripper | Parallel, pneumatic |
| Sensors | Reed |
