| Product name: | Product code: |
| --- | --- |
| Modular Production Station Processing Module | CMI-NP-1733 |

## Description

Modular Production Station Processing Module is a rotary indexing table with a drilling or machining unit and a test position. It is used for teaching machining and checking process simulation.

## Technical specification

| | |
|---|---|
| Control Voltage | 24 V DC |
| Base | Aluminium plate |

Modular Production Station Processing Module is a rotary indexing table with a drilling or machining unit and a test position. It is designed for teaching machining and checking process simulation. Key highlights include motorised rotary table, drilling unit with 24 V motor and test sensor.

**Features**

- Motorised rotary table
- Drilling unit with 24 V motor
- Test sensor
- Safety guard
- Mounting plate

**Technical Specifications**

| | |
|---|---|
| Table | Rotary, 4 positions |
| Drive | 24 V DC motor |
| Drilling Motor | 24 V DC |
| Sensors | Inductive |
