Product name:	Product code:
Modular Production Station Sorting Module	CMI-NP-1734

Description

Modular Production Station Sorting Module is a conveyor with three slides and diverters for sorting parts into bins by property. It is used for teaching sorting logic in modular production systems.

Technical specification

Control Voltage	24 V DC
Air Supply	6 bar

Modular Production Station Sorting Module is a conveyor with three slides and diverters for sorting parts into bins by property. It is designed for teaching sorting logic in modular production systems. Key highlights include belt conveyor with DC motor, three diverter pushers and three chutes.

Features

- Belt conveyor with DC motor
- Three diverter pushers
- Three chutes
- Colour and material sensors
- Easy PLC connection

Technical Specifications

Conveyor Length	600 mm
Chutes	3
Diverters	Pneumatic
Sensors	Optical, inductive
