Product name:	Product code:
Logistics Trainer Automated Guided Vehicle Module	CMI-NP-1737

Description

Logistics Trainer Automated Guided Vehicle Module is a line following AGV with a lifting platform. It is used for teaching vehicle based transport.

Technical specification

Chassis	Aluminium

Logistics Trainer Automated Guided Vehicle Module is a line following AGV with a lifting platform. It is designed for teaching vehicle based transport. Key highlights include magnetic line sensors, lift platform and battery.

Features

- Magnetic line sensors
- Lift platform
- Integrated battery for reliable use
- Integrated controller for reliable use
- Integrated wheels for reliable use

Technical Specifications

Payload	1 kg
Navigation	Magnetic tape
Battery	12 V
Speed	0.3 m/s
Controller	Microcontroller
