Product name:	Product code:
DC Shunt Motor Speed Control Trainer	CMI-NP-1748

Description

DC Shunt Motor Speed Control Trainer is a trainer for armature voltage and field flux control of a DC shunt motor. It is used for hands-on training in the drive, control and characteristics of electric motors.

Technical specification

Standard Accessories

- Patch cord set
- Experiment manual
- Mains cord

The DC Shunt Motor Speed Control Trainer is a trainer for armature voltage and field flux control of a DC shunt motor. It is designed for hands-on training in the drive, control and characteristics of electric motors.

Features

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India
Email us at: export@civilmechanicalindia.com

- Manual with circuit diagrams and observation tables
- Complete experiments on speed, torque and direction control
- Front panel with mimic diagram and 4 mm safety sockets
- Overload and short-circuit protection built in

Technical Specifications

Motor	220 V DC, 0.5 kW
Rated speed	1500 rpm
Loading	Rope brake or eddy current
Power supply	230 V AC, 50 Hz, single phase
Protection	MCB and fuse
Construction	Powder-coated MS enclosure
