Product name:	Product code:
Relay Logic and Interlocking Training Device	CMI-NP-1758

Description

Relay Logic and Interlocking Training Device is a trainer for building relay logic, latching and interlocking circuits used in motor control.

Technical specification

Standard Accessories

- Patch cord set
- Connecting leads
- Experiment manual

The Relay Logic and Interlocking Training Device is a trainer for building relay logic, latching and interlocking circuits used in motor control. It is designed for comprehensive training in electrical machines, wiring, protection and control circuits.

Features

- Bench or table mounting with trolley option
- Detailed manual with wiring diagrams
- Modular layout with plug-in circuit modules
- Covers wiring, motor control and protection experiments

Technical Specifications

Relays	8 nos, 24 V DC, 4 changeover
Inputs	Push buttons and limit switches
Indicators	LED lamps 24 V DC
Power supply	415 V AC, 3 phase, 50 Hz
Protection	ELCB, MCB and thermal overload
Frame	Powder-coated MS with aluminium panel
