Product name:	Product code:
Single Phase Energy Meter Wiring Training Device	CMI-NP-1759

Description

Single Phase Energy Meter Wiring Training Device is a trainer for connecting and testing single phase energy meters with variable loads.

Technical specification

Standard Accessories

- Patch cord set
- Connecting leads
- Experiment manual
- Mains cord

The Single Phase Energy Meter Wiring Training Device is a trainer for connecting and testing single phase energy meters with variable loads. It is designed for comprehensive training in electrical machines, wiring, protection and control circuits.

Features

- Detailed mimic wiring diagram
- Modular layout with plug-in circuit modules
- Covers wiring, motor control and protection experiments
- Fault insertion switches for troubleshooting practice

Technical Specifications

Meter	10 - 40 A electronic meter
Load	Lamp bank 0 - 2 kW
Check	Stopwatch and pulse counter
Power supply	415 V AC, 3 phase, 50 Hz
Protection	ELCB, MCB and thermal overload
Frame	Powder-coated MS with aluminium panel
