Product name:	Product code:
Star Delta Starter Training Panel	CMI-NP-1760

Description

Star Delta Starter Training Panel is a training panel with three contactors, timer and thermal relay for studying star delta starting of a motor.

Technical specification

Frame	Powder-coated MS with aluminium panel

Standard Accessories

- Patch cord set
- Connecting leads
- Experiment manual

The Star Delta Starter Training Panel is a training panel with three contactors, timer and thermal relay for studying star delta starting of a motor. It is designed for comprehensive training in electrical machines, wiring, protection and control circuits.

Features

- Modular layout with plug-in circuit modules
- Covers wiring, motor control and protection experiments
- Fault insertion switches for troubleshooting practice
- Shrouded 4 mm safety terminals throughout

Technical Specifications

Motor	415 V, 1.1 kW
Contactors	3 nos, 12 A
Timer	Star-delta 0 - 30 s
Power supply	415 V AC, 3 phase, 50 Hz
Protection	ELCB, MCB and thermal overload
