Product name:	Product code:
Retro-Reflective Sensor Training Set	CMI-NP-1770

Description

Retro-Reflective Sensor Training Set is a set with polarised retro-reflective sensors, reflectors and object samples for transparent and opaque object detection.

Technical specification

Base	Aluminium profile with T-slots

Standard Accessories

- Sensor mounting kit
- Connecting cables
- Experiment manual

The Retro-Reflective Sensor Training Set is a set with polarised retro-reflective sensors, reflectors and object samples for transparent and opaque object detection. It is designed for learning the installation, alignment and application of optical sensors in automated mechatronic systems.

Features

- PLC compatible 24 V DC PNP or NPN outputs
- Practical tasks on detection, counting and sorting
- Aluminium profile base plate with T-slots
- Includes wiring tasks with safety plugs

Technical Specifications

Range	0 - 5 m
Reflector	Triple prism 50 mm
Output	PNP/NPN selectable
Supply	230 V AC, 50 Hz, single phase
Sensor supply	24 V DC
