NAUGRA®

Product name:	Product code:
Spectrometer Optical Measurement Training System	CMI-NP-1782

Description

Spectrometer Optical Measurement Training System is a system with a grating spectrometer module, light source and PC interface for absorption and colour measurement.

Technical specification

Light source	LED and diode laser < 1 mW

Standard Accessories

- Lens set
- Fibre cable
- Experiment manual

The Spectrometer Optical Measurement Training System is a system with a grating spectrometer module, light source and PC interface for absorption and colour measurement. It is designed for training in opto-electronic components, light-based measurement and optical devices combined with mechatronic control.

Features

- Digital readouts for easy data recording
- Optical bench with movable carriers
- Combines optics with sensors and actuators
- Suitable for optics, photonics and mechatronics courses

Technical Specifications

Range	400 - 700 nm
Resolution	2 nm
Interface	USB
Supply	230 V AC, 50 Hz, single phase
Optical bench	1000 mm rail
