Product name:	Product code:
Photoelectric Fault Diagnosis Assessment Device	CMI-NP-1792

Description

Photoelectric Fault Diagnosis Assessment Device is a device with hidden faults in photoelectric circuits for assessing troubleshooting skills.

Technical specification

Worktable	Aluminium profile frame

Standard Accessories

- Task sheets
- Connecting cables
- Assessment guide

The Photoelectric Fault Diagnosis Assessment Device is a device with hidden faults in photoelectric circuits for assessing troubleshooting skills. It is designed for training and skill assessment of students on opto-mechatronic systems with fault finding and performance scoring.

Features

- Assessment faults inserted by examiner key
- Modules for assembly, wiring, programming and testing
- Industrial grade optical and mechanical parts
- Task sheets and scoring forms provided

Technical Specifications

Fault bank	12 faults
Sensors	4 types
Test points	4 mm sockets
Supply	230 V AC, 50 Hz, single phase
Controller	PLC, 24 V DC I/O
