NAUGRA®

Product name:	Product code:
PCB Engraving Machine with Software Simulation	CMI-NP-1820

Description

PCB Engraving Machine with Software Simulation is an engraving machine bundled with software that simulates tool paths before cutting.

Technical specification

Interface	USB

Standard Accessories

- Engraving bits
- Clamp set
- Software CD

The PCB Engraving Machine with Software Simulation is an engraving machine bundled with software that simulates tool paths before cutting. It is designed for engraving, drilling and routing of copper clad boards for prototype PCBs in labs and workshops.

Features

- Safe enclosure with emergency stop
- CNC controlled isolation routing of copper tracks
- Software accepts Gerber and drill files
- Rigid steel or aluminium frame

Technical Specifications

Area	300 x 200 mm
Software	CAM with simulation
Formats	Gerber, DXF, HPGL
Supply	230 V AC, 50 Hz, single phase
Axes	X, Y, Z stepper driven
