Product name:	Product code:
Electroplating Unit for PCB with Rectifier	CMI-NP-1824

Description

Electroplating Unit for PCB with Rectifier is a copper electroplating tank with a rectifier for building up plated through holes.

Technical specification

Standard Accessories

- Anodes
- Racks
- Chemical kit

The Electroplating Unit for PCB with Rectifier is a copper electroplating tank with a rectifier for building up plated through holes. It is designed for through-hole plating and chemical metallization of double sided and multilayer PCBs in a lab.

Features

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India

- Heated and agitated tanks for uniform plating
- Corrosion-resistant PP or PVC construction
- Digital temperature and timer controls
- Fume extraction connection

Technical Specifications

Rectifier	0 - 20 V, 0 - 10 A
Tank	30 L
Agitation	Air or cathode rocker
Supply	230 V AC, 50 Hz, single phase
Tank material	Polypropylene
Heater	PTFE or titanium, with controller
