Product name:
PCB Electroplating Tank with Cathode Rocker

Product code:
CMI-NP-1828

Description

PCB Electroplating Tank with Cathode Rocker is a plating tank with moving cathode rod for uniform copper thickness.

Technical specification

- Anodes
- Racks
- Chemical kit

The PCB Electroplating Tank with Cathode Rocker is a plating tank with moving cathode rod for uniform copper thickness. It is designed for through-hole plating and chemical metallization of double sided and multilayer PCBs in a lab.

Features

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India

- Digital temperature controller
- Fume extraction connection
- Complete small-scale hole plating process
- Heated and agitated tanks for uniform plating

Technical Specifications

Stroke	50 mm, 15 cycles/min
Tank	40 L
Rectifier	0 - 15 V, 20 A
Supply	230 V AC, 50 Hz, single phase
Tank material	Polypropylene
Heater	PTFE or titanium, with controller

Standard Accessories
