Product name:	Product code:
PLC Batch Process Control Training Device	CMI-NP-1834

Description

PLC Batch Process Control Training Device is a trainer with tanks, pumps and level switches for programming batch mixing sequences.

Technical specification

Communication	Ethernet and RS485

Standard Accessories

- Programming cable
- Patch cords
- Software disc

The PLC Batch Process Control Training Device is a trainer with tanks, pumps and level switches for programming batch mixing sequences. It is designed for designing, programming and testing PLC based control systems for industrial automation tasks.

Features

- Programming in ladder, FBD and structured text
- Safety sockets and short-circuit protection
- Suitable for PLC, HMI and SCADA practice
- PLC with 24 V DC digital and analogue I/O

Technical Specifications

Tanks	2 nos, level switches
Pumps	2 nos, 12 V DC
Analogue	0 - 10 V level
Supply	230 V AC, 50 Hz, single phase
PLC I/O	24 DI / 16 DO
