Product name:	Product code:
PLC Conveyor Control Training Device	CMI-NP-1835

Description

PLC Conveyor Control Training Device is a trainer with a belt conveyor and sensors for PLC sequence control.

Technical specification

- Programming cable
- Patch cords
- Software disc

The PLC Conveyor Control Training Device is a trainer with a belt conveyor and sensors for PLC sequence control. It is designed for designing, programming and testing PLC based control systems for industrial automation tasks.

Features

- Suitable for PLC, HMI and SCADA practice
- PLC with 24 V DC digital and analogue I/O
- Simulation modules for lifts, traffic and batch process
- Programming in ladder, FBD and structured text

Technical Specifications

Belt	600 mm, 24 V DC
Sensors	Inductive, optical
Cylinder	1 pneumatic pusher
Supply	230 V AC, 50 Hz, single phase
PLC I/O	24 DI / 16 DO
Communication	Ethernet and RS485

Standard Accessories
