Product name:	Product code:
PLC Water Level and Pump Control Training Device	CMI-NP-1842

Description

PLC Water Level and Pump Control Training Device is a trainer with water tank and level sensors for PLC based pump control.

Technical specification

Communication	Ethernet and RS485

Standard Accessories

- Programming cable
- Patch cords
- Software disc

The PLC Water Level and Pump Control Training Device is a trainer with water tank and level sensors for PLC based pump control. It is designed for designing, programming and testing PLC based control systems for industrial automation tasks.

Features

- Suitable for PLC, HMI and SCADA practice
- PLC with 24 V DC digital and analogue I/O
- Simulation modules for lifts, traffic and batch process
- Programming in ladder, FBD and structured text

Technical Specifications

Tank	10 L acrylic
Sensors	Float and analogue
Pump	12 V DC
Supply	230 V AC, 50 Hz, single phase
PLC I/O	24 DI / 16 DO
