NAUGRA®

Product name:	Product code:
Portable PLC Kit with Temperature Control	CMI-NP-1930

Description

Portable PLC Kit with Temperature Control is a PLC kit with a heater and thermocouple for temperature control.

Technical specification

- Programming cable
- Patch cords
- Software disc

The Portable PLC Kit with Temperature Control is a PLC kit with a heater and thermocouple for temperature control. It is designed for learning PLC programming and wiring on a portable kit with switches, lamps and simple load simulators.

Features

- Built-in protected 12 V DC supply
- Optional simulation modules
- Portable case with built-in PLC
- Input switches and output LEDs on panel

Technical Specifications

Heater	100 W
Sensor	K type
Range	Ambient to 150 deg C
Supply	230 V AC, 50 Hz, single phase
PLC I/O	14 DI / 10 DO
Programming	USB or RS232

Standard Accessories
