NAUGRA®

Product name:	**Product code:**
Portable PLC Kit with Transistor Outputs	CMI-NP-1932

Description

Portable PLC Kit with Transistor Outputs is a PLC kit with fast transistor outputs for counters, timers and motion.

Technical specification

- Programming cable
- Patch cords
- Software disc

The Portable PLC Kit with Transistor Outputs is a PLC kit with fast transistor outputs for counters, timers and motion. It is designed for learning PLC programming and wiring on a portable kit with switches, lamps and simple load simulators.

Features

- Input switches and output LEDs on panel
- Ladder programming with PC software
- Short-circuit protected 24 V DC supply
- Optional simulation modules

Technical Specifications

Outputs	Transistor, 0.5 A
High speed	100 kHz
Counters	High speed
Supply	230 V AC, 50 Hz, single phase
PLC I/O	14 DI / 10 DO
Programming	USB or RS232

Standard Accessories
