Product name:	Product code:
Process Control Valve Characteristics Training System	CMI-NP-1949

Description

Process Control Valve Characteristics Training System is a trainer for plotting control valve characteristics.

Technical specification

- Tubes
- Manual
- Cables

The Process Control Valve Characteristics Training System is a trainer for plotting control valve characteristics. It is designed for studying the control of temperature, flow, level and pressure variables in process industries.

Features

- Latching type experiments
- Industrial transmitters and control valves
- PC or PLC data acquisition
- Floor standing frame with trolley wheels

Technical Specifications

Valves	Linear, equal percentage
Actuator	Pneumatic
Flow	0 - 25 L/min
Supply	230 V AC, 50 Hz, single phase
Signals	4 - 20 mA
Controller	PID, programmable

Standard Accessories
