Product name:	Product code:
Tank Level Process Control Trainer with DP Transmitter	CMI-NP-1951

Description

Tank Level Process Control Trainer with DP Transmitter is a trainer for level control of a tank with a differential pressure transmitter.

Technical specification

Controller	PID, programmable

Standard Accessories

- Tubes
- Manual
- Cables

The Tank Level Process Control Trainer with DP Transmitter is a trainer for level control of a tank with a differential pressure transmitter. It is designed for studying the control of temperature, flow, level and pressure variables in process industries.

Features

- Industrial transmitters and control valves
- PC or PLC data acquisition
- Floor standing frame with trolley wheels
- Multi-variable process rig

Technical Specifications

Tank	20 L
Sensor	DP
Control	PID
Supply	230 V AC, 50 Hz, single phase
Signals	4 - 20 mA
