| Laboratory Overhead Stirrer 100 Litre Capacity | CMI-IND-0047 |

## Description

Digital overhead stirrer with high torque motor and variable speed for mixing viscous liquids, pastes and slurries. Used in paint, adhesive, polymer and chemical development and QC labs.

## Technical specification

- Propeller impeller
- Clamp and stand
- Power cable

A brushless motor drives a stainless steel shaft and impeller with constant torque from 50 to 2000 rpm. The digital display shows speed and torque, and a vertical stand holds the unit above the vessel. It handles viscous samples that magnetic stirrers cannot.

**Features**

- Digital speed and torque display
- Torque up to 200 N-cm
- Overload protection and soft start
- Keyless chuck for shafts to 10 mm
- Includes clamp and stand

**Technical Specifications**

| | |
|---|---|
| Stirring capacity | Up to 100 litre (water) |
| Speed range | 50 to 2000 rpm |
| Maximum torque | 200 N-cm |
| Viscosity range | Up to 100,000 mPa.s |
| Chuck capacity | 0.5 to 10 mm |
| Display | LCD speed, torque, timer |
| Power supply | 230 V AC, 50 Hz, 200 W |

**Standard Accessories**
