Product name:	Product code:
Digital Microscope for Die Cut Depth Inspection of Labels	CMI-IND-0113

Description

Digital microscope with measuring software used to inspect kiss-cut depth, liner penetration and edge quality of die-cut label laminates. Used in label converters for press set-up and complaint analysis.

Technical specification

Light Source	LED, adjustable
Stand	Metal with fine focus
Power Supply	230 V AC adaptor
Software	Windows compatible

Standard Accessories

- Calibration slide
- Specimen cutter

A cross section of the laminate is viewed at up to 200x magnification and the face, adhesive and liner layers are measured on screen. Correct cut depth avoids liner damage that causes web breaks and label dispensing failures. Images can be saved with measurement overlays for customer reports.
