Product name:	Product code:
Precision Strip Cutter for Label Specimens 25 mm	CMI-IND-0117

Description

Double-blade cutter that slices label and adhesive tape specimens into exact 25 mm wide strips with clean parallel edges. Used for preparing peel, tack and shear samples.

Technical specification

Standards	Prepares samples for FINAT FTM 1, ASTM D3330
Base	Anodised aluminium 400 x 150 mm

Standard Accessories

- Spare blade set

Two parallel hardened blades and a hold-down plate give straight cuts without edge damage or adhesive smearing. Strip width accuracy affects peel force results directly, so this cutter reduces variation at the source. The cutter works on paper, film and laminated facestocks.
