Product name:	Product code:
Standard 2 kg Pressure Roller for Label Testing	CMI-IND-0119

Description

Rubber covered roller with a fixed mass used to bond label specimens to test panels under repeatable pressure. Used in peel, tack and shear sample preparation for label QC labs.

Technical specification

- Roller stand

The roller applies a uniform 2 kg load at a controlled speed, ensuring each sample is laminated the same way before testing. Its hard rubber surface and exact mass comply with FINAT and ASTM requirements. Using the roller removes air bubbles and operator variation.

Features

- Steel core with 2 kg total mass
- Hard rubber cover 6 mm thickness
- Rolling width 45 mm
- Hand speed guide provided
- Long-lasting ground steel handle

Technical Specifications

Mass	2,000 g +/- 10 g
Roller Width	45 mm
Roller Diameter	85 mm
Rubber Hardness	80 +/- 5 Shore A
Rubber Thickness	6 mm
Standards	FINAT FTM 1, ASTM D3330, PSTC-101
Material	Mild steel core, nickel plated

Standard Accessories
