Product name:	Product code:
Anilox Hand Proofer for Flexo Inks	CMI-IND-0121

Description

Hand-held anilox roller applicator used to proof flexographic inks on films and papers at a known cell volume. Used by ink and flexo printers for quick shade checks.

Technical specification

- Rubber cover for roller

A ceramic anilox roller with a laser engraved cell structure transfers a controlled volume of ink to the substrate when drawn across a surface. The hand proofer lets operators compare new batches against an approved standard before running a job. Different roller volumes are available to match press conditions.
