Product name:	Product code:
Laboratory Printability Tester for Ink Proofing	CMI-IND-0127

Description

Compact proofing press that produces repeatable printed ink films on paper, board or film strips using a constant pressure and speed. Used by ink makers and converters for colour matching and print trials.

Technical specification

- Print discs (2 pcs)
- Ink spreading roller
- Sample clamps

Ink is applied to a printing disc, transferred to a sample strip at accurate speed and nip pressure, and dried for evaluation. Because conditions are controlled, differences among inks become visible rather than operator effects. It supports gloss, density and rub-off tests on lab prints.

Features

- Speed range 0.2 - 2 m/s stepless
- Adjustable printing pressure 100 - 800 N
- Multiple printing discs for different widths
- Easy inking and cleaning of discs
- Digital speed display

Technical Specifications

Print Width	25 mm and 50 mm
Print Speed	0.2 - 2.0 m/s
Print Pressure	100 - 800 N
Sample Length	up to 340 mm
Standards	ISO 2834-1, ISO 2846 (reference)
Power Supply	230 V AC, 50 Hz
Construction	Aluminium alloy and steel

Standard Accessories
