NAUGRA®

Product name:	Product code:
Pipe Dimension Measuring Set with Pi Tape	CMI-IND-0186

NAUGRA®

Description

Set of calibrated tools for measuring mean outside diameter, ovality and wall thickness of plastic pipes. Used by pipe makers for inline and laboratory dimensional checks.

Technical specification

A pi tape gives the mean outside diameter directly and a ball-ended micrometer or digital gauge measures wall thickness at multiple points. Ovality and wall eccentricity can be calculated. These are core QC instruments for every pipe line.

Features

- Pi tape 10 - 500 mm
- Wall thickness gauge with ball anvil
- Digital vernier caliper
- Measurement record sheet
- Fitted case

Technical Specifications

Pi Tape Range	10 - 500 mm
Pi Tape Resolution	0.01 mm
Wall Gauge Range	0 - 25 mm, 0.01 mm
Caliper	0 - 300 mm, 0.01 mm
Standards	ISO 3126, IS 4985
Case	Wooden or ABS

Standard Accessories

- Calibration rings
