Product name:
Filled Container Weight Checkweigher Bench Scale with Statistical Software

Product code:
CMI-IND-0247

Description

Bench checkweigher with statistical process control software for sampling net weight of filled packs. Used by filling lines to track fill accuracy and give early warning on drift.

Technical specification

Tare Range	Full capacity
Indicator	Color LCD with LED lamps
Interface	USB and RS232
Power	230 V AC adaptor

Standard Accessories

- Calibration weight
- Dust cover
- Software

Packs are placed on the platform and the scale calculates net weight after tare. Software plots X-bar and range charts and counts packs outside tolerance. Operators can view trends before the filler goes out of control.
