Product name:	Product code:
Water Activity Meter for Packaged Foods	CMI-IND-0259

Description

Benchtop water activity meter for dry and semi-moist foods that reads relative humidity above a sealed sample. Used by food packers for shelf life, microbial stability and moisture migration checks.

Technical specification

- Sample cups
- Calibration salts
- Cleaning kit

A small sample is placed in a cup and sealed in the measurement chamber until equilibrium. The sensor reads the relative humidity above the sample, expressed as aw. Results are available in about five minutes.

Features

- Range 0.1 to 1.0 aw
- Accuracy +/- 0.003 aw
- Temperature controlled chamber
- Fast 5 min reading
- Disposable sample cups

Technical Specifications

Test Standards	AOAC 978.18, ISO 18787
Range	0.03 to 1.00 aw
Accuracy	+/- 0.003 aw
Temperature	15 to 40 deg C
Sample Cup	40 mm
Read Time	5 minutes
Display	Touch screen
Power	230 V AC, 50 Hz
