Product name:	Product code:
Combined Load Pressure Torque Tester for PET Bottles	CMI-IND-0264

Description

Combined test stand that checks top load, internal pressure resistance and closure torque of finished PET bottles on one frame. Used by stretch blow plants for final bottle qualification against customer drawings.

Technical specification

- Neck seals
- Torque adapter
- Manual

One stand integrates a compression platen, a pressure head and a torque meter. Operators run all tests on a single bottle sample. It is suited to bottle makers who certify to a customer drawing.

Features

- Load duration 1 min
- Load cell 2 kN
- Pressure 0 to 1500 kPa
- Torque 0 to 10 Nm
- Touchscreen

Technical Specifications

Test Standards	ASTM D2659, ASTM D3474, ISO 7458
Load	0 to 2 kN
Pressure	0 to 1500 kPa
Torque	0 to 10 Nm
Accuracy	+/- 0.5 % FS
Bottle Height	Up to 400 mm
Display	Touchscreen
Power	230 V AC, 50 Hz
