Product name:	Product code:
Compression Tester for Blow Molded Drums	CMI-IND-0273

Description

Heavy duty compression tester for blow molded plastic drums, jerry cans and large containers. Used by manufacturers of industrial packaging to qualify stacking load capacity and design changes.

Technical specification

- Platens
- Software
- Safety guard

A drum is placed between wide platens and loaded vertically. Peak top-load and deformation are recorded for design improvement. Test also supports hold-at-load stacking creep.

Features

- Capacity 50 kN
- Platen 1000 x 1000 mm
- Hold function
- Digital display
- Heavy frame

Technical Specifications

Test Standards	ASTM D2659, ASTM D642, UN 6.1 stack test reference
Capacity	50 kN
Platen	1000 x 1000 mm
Accuracy	+/- 1 %
Daylight	1200 mm
Speed	5 to 100 mm/min
Display	Digital
Power	415 V AC, 3 phase
