Product name:	Product code:
Gloss and Haze Meter for Blow Molded Bottles	CMI-IND-0276

Description

Meter that measures gloss and haze of blow molded bottles and films. Used by cosmetic, food and pharma packaging molders to check appearance and clarity and to set mold temperature and cooling.

Technical specification

- Calibration tile
- Case
- USB cable

A 60 degree gloss head and a haze unit measure appearance on flat areas or small curved parts. Clarity is expressed in percent haze. Results are used to set mold temperature and cooling.
