| Ultrasonic Wall Thickness Gauge for Blow Molded Tanks | CMI-IND-0280 |

## Description

Ultrasonic gauge for non-destructive thickness measurement of HDPE tanks and large blow molded components from one side. Used by tank and drum makers to confirm wall distribution after molding.

## Technical specification

- Probe
- Couplant
- Charger

The probe is coupled to the outer surface and thickness is measured from echo time. Many points are checked around the part. Data is stored and downloaded for reports.

**Features**

NAUGRA®
