Product name:	Product code:
Moisture Content Karl Fischer Titrator for Pharmaceuticals	CMI-IND-0283

Description

Automatic volumetric Karl Fischer titrator for water content of drugs, APIs and excipients from 100 ppm upward. Used in pharmaceutical QC for hygroscopic materials and finished dosage forms.

Technical specification

Display	Touchscreen
Cell	Glass
Power	230 V AC, 50 Hz

Standard Accessories

- Reagent
- Syringe
- Cell

Sample is introduced into a titration cell and water is titrated with KF reagent. Result in percent or ppm. Standard for hygroscopic APIs.
