Product name:	Product code:
Tablet Disintegration Test Apparatus Double Basket	CMI-IND-0284

Description

Reciprocating double basket disintegration tester with thermostatic water bath at 37 deg C. Used by pharmaceutical QC labs to check the time taken by tablets and capsules to disintegrate.

Technical specification

Beakers	1000 ml, 2
Timer	Digital
Power	230 V AC, 50 Hz

Standard Accessories

- Discs
- Beakers
- Basket rack

Tablets sit in tubes of a basket that moves up and down in water at 37 deg C. The time when all particles pass the screen is the disintegration time. Two stations allow simultaneous tests.
