Product name:	Product code:
Tablet Friability Tester Dual Drum USP Type	CMI-IND-0286

Description

Dual drum friabilator that tumbles tablets for 100 revolutions at 25 rpm and measures weight loss. Used in pharmaceutical QC to check that tablets survive packing, transport and handling.

Technical specification

- Dusting brush
- Spare drum
- Manual

Preweighed tablets tumble in a drum at 25 rpm for 100 revolutions, then are dusted and reweighed. Percentage loss is compared with the limit of 1 percent. Two drums allow duplicate samples.
