Product name:	Product code:
Tablet Hardness Tester Digital with Printer	CMI-IND-0287

Description

Motorized tablet hardness tester that measures crushing strength of round and oval tablets in N or kp and prints results. Used in pharmaceutical production and QC to check compression force settings.

Technical specification

- Thermal paper
- Calibration weights
- Dust cover

A tablet is held between two jaws and crushed at a constant rate while peak force is shown. Hardness values in kp, N or SC are displayed. Operators check batch uniformity during compression.

Features

- Range 2 to 200 N, 0.5 to 20 kp
- Motorized jaw drive
- Fits round and oval tablets
- Printer output
- Statistics for batches

Technical Specifications

Test Standards	USP , IP, BP
Range	2 to 200 N
Accuracy	+/- 1 N
Tablet Size	Up to 25 mm
Display	LCD
Units	N, kp, SC
Printer	Thermal
Power	230 V AC, 50 Hz

Standard Accessories
