Product name:	Product code:
Film Haze and Light Transmittance Meter for Transparent Laminates	CMI-IND-0355

Description

Hazemeter measuring luminous transmittance and haze of clear packaging films and window laminates. Used in food packaging, solar and optical film quality control. Clear grades can be compared quickly against customer specifications.

Technical specification

- Haze standard
- Sample holder
- Cleaning cloth

Light from a D65 source passes through the film into an integrating sphere. Total transmittance and diffuse scatter are measured to give haze percent per the standard geometry.

Features

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India

- Integrating sphere geometry
- D65 / C illuminant
- Haze and transmittance in one reading
- Port for film up to 100 mm
- Calibration standards

Technical Specifications

Transmittance range	0 to 100%
Haze range	0 to 100%
Resolution	0.01%
Repeatability	+/-0.1%
Port diameter	21 mm
Light source	LED, D65
Power	230 V AC, 50 Hz
Standards	ASTM D1003, ISO 14782

Standard Accessories
