Product name:	Product code:
Shoe Heel Strength and Attachment Tester	CMI-IND-0368

Description

Tests the pull-off strength of heel attachments and heel tip retention in shoes. Used by footwear manufacturers and quality labs. It verifies that heels remain fixed under pulling and leverage in wear.

Technical specification

- Heel hook
- Shoe clamp
- Calibration weights

The shoe is clamped and a load applied to the heel in the axial direction. The load at heel dislodgement is read to confirm durability.

Features

- Digital load display
- Adjustable shoe fixture
- Peak hold
- Dual range
- Sturdy base

Technical Specifications

Capacity	2 kN
Resolution	1 N
Accuracy	+/-1%
Speed	50 mm/min
Stroke	200 mm
Hold fixture	Adjustable
Power	230 V AC, 50 Hz
Standards	ISO 19953, SATRA TM113, IS 15298
