Product name:	Product code:
Leather Colour Fastness to Rubbing Crockmeter	CMI-IND-0372

Description

Rubbing tester that evaluates colour transfer from leather finishes to dry or wet felt. Used for upholstery, garment and footwear leather. Dry and wet rubbing helps reduce staining complaints on light fabrics and linings.

Technical specification

- Felt pads
- Grey scale
- Sample plate

A felt pad under a 9.8 N load rubs the leather in a straight path for set cycles. The staining of the felt is rated against the grey scale.
