Product name:	Product code:
Leather Thickness Gauge Dial Type with Constant Pressure	CMI-IND-0378

Description

Dial gauge with a large presser foot for reading leather thickness at standard pressure. Used in tanneries for grading and ordering. Consistent foot pressure gives comparable results across hides and batches.

Technical specification

- Calibration block
- Spare foot

A flat foot of 10 mm diameter applies 49 kPa on the leather. The dial reads in 0.01 mm with a lifting lever for ease of insertion.
