Product name:	Product code:
Ink Rub Resistance Tester for Printed Surfaces	CMI-IND-0381

Description

Machine that rubs printed samples against one another to evaluate scuff and abrasion resistance. Used by packaging and label printers. It helps decide whether prints survive transport and shelf handling.

Technical specification

- Weight set
- Rubber pad
- Test paper

Two printed strips are rubbed with a load of 2 kg for a set number of strokes. Ink removal or marking is graded visually or by densitometry.
