Product name:	Product code:
Ink Viscosity Cup Set with Flow Timing Stand	CMI-IND-0382

Description

Zahn and Ford cups with stand for checking ink viscosity at the press. Used by flexographic and gravure printers. Regular checks help keep ink flow and print density stable during runs.

Technical specification

- Thermometer
- Timer

The cup is dipped in ink and lifted, and the time for the stream to break is noted. Set of cups with different orifices serves a range from thin solvent inks to thick varnish.
