Product name:	Product code:
Print Adhesion Tape Tester for Printed Film	CMI-IND-0383

Description

Applies standard tape to printed film and peels at controlled force to see ink removal. Used for packaging films and labels. It gives repeatable assessment of film printing before converting or laminating.

Technical specification

- Tape roll
- Roller
- Chart

A roller of 2 kg applies tape to a print and the tape is removed at 180 degrees. The ink transfer is assessed visually or by density loss.
