Product name:	Product code:
Cross Cut Adhesion Test Kit for Paint Films	CMI-IND-0392

Description

Cross hatch cutters, tape and illuminated magnifier for rating adhesion of coatings to substrates. Used in paint labs and applicator quality checks. It is a quick shop-floor test for inspecting coating quality after curing.

Technical specification

- Tape
- Magnifier

A lattice of cuts with 1, 2 or 3 mm spacing is made through the film to the substrate. Tape applied and removed shows how much coating detached, rated from 0 to 5 by the supplied chart.

Features

- Cutters 1, 2 and 3 mm
- Calibrated tape
- Illuminated magnifier
- Rating chart
- Carry case

Technical Specifications

Spacing	1, 2, 3 mm
Teeth	6
Tape	25 mm, 10 N
Film thickness	up to 250 um
Magnifier	10x
Rating	0 to 5
Standards	ISO 2409, ASTM D3359

Standard Accessories

- Cutters
