Product name:	Product code:
Cyclic Corrosion Test Chamber for Coated Panels	CMI-IND-0394

Description

Programmable chamber cycling salt spray, humidity and drying to test automotive and industrial coatings. Used for corrosion resistance in paint approval. It reproduces real outdoor wet-dry cycles more closely than constant salt fog.

Technical specification

Power	415 V, 3 phase
Standards	ISO 11997-1, ASTM D5894, GM 9540P

Standard Accessories

- Racks
- Nozzle
- Reservoir

The chamber follows programmed profiles of spray, dry and wet phases at controlled temperatures. Scribed panels are examined for creepage and blistering.

Features

NAUGRA®

- Programmable cycles
- Touchscreen
- Spray, dry, humid
- Purified water
- Rack

Technical Specifications

Volume	1000 L
Temperature	ambient to 70 deg C
Humidity	95% RH
Spray	5% NaCl
Cycles	programmable
