Product name:	Product code:
Impact Resistance Tester for Coated Panels	CMI-IND-0397

Description

Falling weight tester that checks cracking or delamination of coatings after direct and reverse impact. Used for appliance, automotive and powder coat finishes. It shows whether paint will chip when the part is knocked in handling or service.

Technical specification

- Indenters
- Die

A weight of 1 kg falls from a set height onto an indenter that deforms the coated panel. The maximum height without cracking is noted.
