Product name:	Product code:
Ceramic Glaze Mohs Hardness and Scratch Test Set	CMI-IND-0453

Description

Case with Mohs mineral picks, a loaded scratch stylus and a stereo microscope for assessing hardness and scratch marks on glaze surfaces. Used by glaze developers and ceramic quality laboratories.

Technical specification

- Mohs pick set
- Stylus
- Carry case

Reference minerals scratch the glazed surface, and the marks are examined under 40x magnification. The set also includes a loaded scratch stylus for repeatable testing.
