Product name:	Product code:
Glass Scratch and Abrasion Resistance Tester for Coated Glass	CMI-IND-0467

Description

Reciprocating abrasion tester with a weighted felt pad that rubs coated and mirrored glass for thousands of cycles before haze or transmittance change is measured. Used by coated glass manufacturers.

Technical specification

- Pad set
- Weights
- Specimen clamps

A weighted pad abrades the surface for thousands of cycles and then haze or transmittance change is measured. The data reflect cleaning durability.

Features

- Reciprocating carriage with programmable stroke
- Pad holder with 1 kg weight
- Cycle counter
- Sample table 300 mm
- Variable speed

Technical Specifications

Stroke	10 to 100 mm
Speed	10 to 60 cycles/min
Load	250 g to 2 kg
Table	300 x 300 mm
Counter	Preset 99,999
Pad	Felt F5
Standards	EN 1096-2, ISO 9211-4, ASTM D1044
Power	230 V AC, 50 Hz

Standard Accessories
